

# Alchemy of Transformation

Atum O'Kane

## ZOOM

The Alchemy of Transformation is an in-depth experiential study of seven essential alchemical operations, which lie at the heart of the process of transformation. Together we will explore each operation from its corresponding psychological and spiritual dimensions. How they are reflected in and affect Relationships is also a theme. Special attention will be given to the archetypal images, myths and sacred rituals of various traditions, which embody the operations. A unique aspect of the program is its emphasis upon a rich collection of spiritual practices that facilitate the alchemy of transformation, and creative exercises that help to integrate the operations.

This training is open to those who have studied with Atum and their friends.
